About this report

In order to demonstrate all our actions to our stakeholders in a transparent and systematic way, Grecotel Eva Palace is introducing its annual Sustainability Report. The objective of this Report is to disclose our sustainability performance and approach with respect to the society, the environment, human resources and culture. This is the fifth public sustainability report of Grecotel Eva Palace and covers 2019 season (reporting periods are from opening to the closing day).

The COVID-19 global pandemic posed an existential threat not just to the hospitality and travel industries, but also to our very way of life. The unprecedented disruption that was caused to our business operations in 2020 required the Group to take exceptional measures and keep the Grecotel Eva Palace closed for 2020. This is the reason why we are presenting data for 2019.

Efficient use

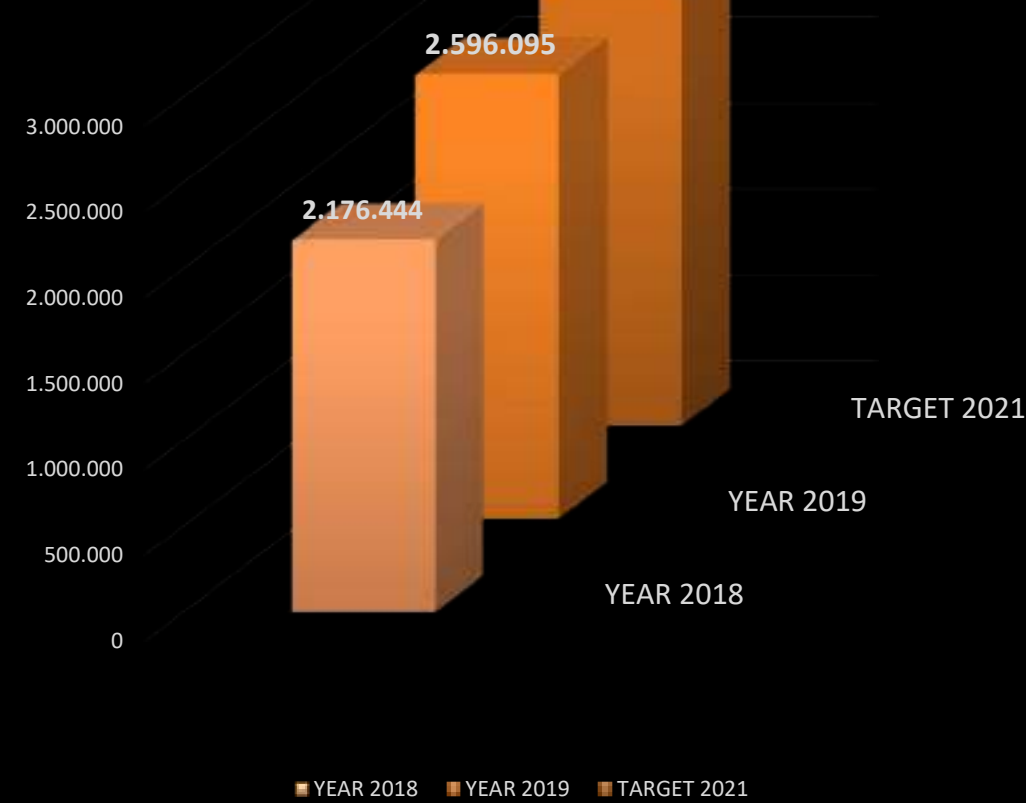

Energy consumption is the main contributor to direct and indirect GHG emissions which affect the climate change. By creating the necessary infrastructure and using the latest available technology in energy management, we endeavor to reduce our energy consumption and maximize the use of renewable energy. Advanced materials and systems are installed in the buildings of o to reduce energy consumption. These include:

- Energy-efficient window panels.
- A high-quality, external wall insulation system that significantly reduces energy losses by wrapping the building in a thermally resistant envelope.
- Low energy technology lighting.
- Electronic lighting ballasts.
- Central lighting control systems.

Conservation of Biodiversity

At Greotel Eva Palace, we have developed partnerships with a series of organizations (e.g. with NGOs like ARCHELON, WWF), aiming to protect and preserve ecosystems, while also raising awareness between our guests and employees.

Experience & Activities

Also, eco-learning programs for guests, available to children at the Grecoland Club, give younger guests the opportunity to learn about the local biodiversity, including turtles, birds and flowers, as well as local customs and products. In the weekly program, there is a blue day and a green day.

Animal Protection

Animal welfare is included in our discussion of sustainability because of the fundamental importance of respecting other living creatures.

We avoid putting further pressure on endangered species or supporting environmentally harmful production.

Eco-learning programs for guests

We invite our guests to explore the unique biodiversity and visit the onsite herb gardens.

Garden

To plant a garden is to believe to tomorrow.

Corfu's natural beauty lies in a richness of velvet green cypress trees, silver olive groves and mountainous skylines that plunge into the bluest of waters.

Grecotel Eva Palace implements garden programs:

- a new model of alternative hotel gardening, avoiding the use of chemical fertilizers and pesticides,
- we plant Mediterranean and local plants in our gardens,
- automatic irrigation system in the evening,
- treated wastewater is used for irrigation,
- we apply composting.

214 guests participated in Eco – learning programs.

SUSTAINABLE ARCHITECTURE & ECODESIGN

Aiming at the preservation and protection of our natural heritage, GRECOTEL focuses on integrating sustainable architecture into its hotels, so that they are fully harmonized with the landscape. The renovated "third generation" hotel (such as Grecotel Eva Palace) complexes follow the most modern and sustainable architectural trends, whilst maintaining each destination's special local character, always in harmony and with respect for the local history and people. The idea is that building, landscape and nature merge together causing as less impact on the environment as possible.
